

Miami Web Design Firm - Professional and Affordable Websites

Contributed by Brett Koven - Miami Web Designer

Two Easy Steps and Miami Web Design Firm, Websavers.Com, makes it fast and affordable to have a professional website. MIAMI - FL Miami web design firm, Websavers.Com, specializes in Web Design, Hosting and SEO Marketing. We utilize our creativity, proven strategies and techniques to create engaging, cost effective web sites and marketing solutions. Our target market is the small business with limited capital. We believe that this is an underserved market that deserves high quality and affordable solutions says Brett Koven, lead designer.

We are a boutique firm located in South Florida, Miami to be precise. Our clients however are located locally, nationally and internationally. The Internet truly opens many new opportunities.

We hope that you will allow us to open new doors of opportunities for you.

OUR TWO STEP PROCESS

Step 1: Choose your favorite style number

Step 2: Provide us with your company information (Name, Logo, Menu Choices and the desired information for each page.) All Styles are internet ready. We simply insert your company information, add/change/delete pages as you desire and you are ready to go. It is that easy!

Of course we can further customize each style to your liking. Some changes are easy and we don't charge anything additional. For those more "time-consuming" modifications we will be happy to provide you with a quote.

For more information, please send us a message via our contact us page.

Our Miami based IT firm has designed, trained and implemented networks, databases, contact management and accounting software for the last twenty years. Some of the more high profile clients have included the Miami Heat, Dryclean USA, Thunderbird Boats, MCI and Merrill Lynch. Although these are the "name droppers" we have really focused on small business solutions.

Our longevity in this business is due to the fact that we treat the client's business as if it were our own. We are always looking to increase the client's bottom line by providing cost effective solutions to their everyday needs.
